

1985 DIRECTORY

ISSUED: MAY

NO. 211

Each May, the TAMR issues a Directory of all its members in place of the regular HOTBOX. You will notice that this Directory bears the number 211, this is a sequential number that appears on all TAMR publications. On your address label, you will find such a number. These numbers are used in determining when your membership expires in the TAMR. The number on your address label is the last issue of the HOTBOX or Directory to which you are entitled under your current subscription. A renewal notice is enclosed with that issue to facilitate your renewal.

The format of this Directory is the same as in the past. It is divided into two sections. The first deals with the administrative organization of the TAMR. Here you will find a complete listing of our officials plus information on your region, TAMR committees as well as various services and supplies available to our members. The second section is an alphabetical listing of our members by region. In order to conserve space, modeling/railfanning interests of our members are incorporated into an activity code which appears below each member's name and address. The key provided below should aid you in interpreting this information.

--Dee Gilbert, TAMR Secretary

LISTING INFORMATION

A typical listing of one of our members in the region alphabetical listing might be as follows:

Alfred Q. Modeler (16)S
 1385 R Street
 Milwaukee, WI 53412
 (414) 280-1657
 "Soowaukee Lines"
 HO-y-y-s-a-a-a-c-sdfp-ae

This listing provides the following information about our member. First his name, followed by his address and telephone number. The number in brackets after his name indicate his age, if the letters "L", "S", or "A" appear in the bracket, that means the member is an honorary Life member or an Associate member, respectively. The letter "S" after the brackets indicates that he is a sustaining member. His railroad is the "Soowaukee Lines" and the last line of the listing can be interpreted using the following key:

<u>Scale</u>	<u>Passes</u>	<u>Railfan</u>	<u>Trading</u>	<u>Pike Track Length</u>	<u>Modeling Era</u>
HO, N	y- trades	y- yes	<u>Interests</u>	a) 0-100 ft.	a) 1950-present

In the example above, our member models in HO scale; trades passes; considers himself a railfan and trades slides; has between 0 and 100 feet of track on his layout, models in the post 1950 era; asks potential visitors to make appointments before coming; is in the midst of constructing his layout; is most interested in steam, diesel, freight and passenger equipment and belongs to the NMRA and a railroad historical society. When no information for a particular category is provided by our member, an 'x' appears in that particular category.

The TAMR has developed regions to bring the association to you on a more local level. Many of our regions are active; holding meets and railfanning trips within their boundaries as well as publishing their own newsletters (available at a slight extra charge). In addition, our regions have developed a number of model railroad systems which you can join. These systems help to link up members' railroads throughout the region and extend the "beyond the basement" concept by introducing interchange (real or imagined) between various system members. Below is a listing for each of our regions showing the services it provides, what it costs to join and who to write to for more information on newsletter subscriptions and alike.

CANADIAN REGION: Newsletter--INTERCOLONIAL ceased production last year. Region is currently reorganizing. Information from regional representative.

CENTRAL REGION: Newsletter--WAYFREIGHT issued six times a year. \$3 for members. Subscription from Gerry Dobey, 145 E. Hennepin Ave., Minneapolis, MN 55415.
